Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Remarks

This Office action is responsive to applicant's amendment filed August 3, 2005.

Claims 1-8 are presently pending.

Information Disclosure Statement

The Information Disclosure Statement filed on February 6, 2002 has been considered by the examiner with the following exception: the non-patent document "Kyouritsu SHUPPAN" cited in the February 6, 2002 Information Disclosure Statement has not been considered by the examiner as citation of this document without its accompanying translation, English-language abstract or statement of relevance is not in compliance with MPEP 609. Applicant is requested to provide these related documents for the examiner's consideration.

Claim Rejections - 35 USC § 102 and 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1745

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3 rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Horie et al. (U.S. Pat. 6,146,789).

The rejection is maintained for the reasons of record. The examiner notes the present amendment to claim 1 now reciting that the metal case and sealing body are disposed on opposite surfaces of the sealant. In reply, the examiner asserts that the metal sealing plate/sealing body [22] disclosed in Horie et al. would resultantly be disposed on the opposite side of the sealant [24], relative to the other side in contact with metal case [21], at least along the phantom line shown below:

Response to Amendment

The "Takahashi Declaration" under 37 CFR 1.132 filed July 27, 2005 is sufficient to overcome the rejection of claims 2 and 4-8 based upon Horie et al. view of Shibana et al. (U.S. Pat. 4,772,291).

Allowable Subject Matter

Claims 2 and 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach or suggest the instant invention regarding a phthalocyanine-based metal complex as the organic pigment for the instant sealant, as demonstrated by the Takahashi Declaration with respect to organic electrolyte resistance to dissolution and thermal resistance, resulting in enhanced leakage resistance as shown in Table 2, page 24 of the application.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1745

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
